Email: hr@nes.co.in www.nes.co.in

Position: PIR – Publisher Issue Research Processing

About NES:

NISC Export Services Pvt. Ltd. (NES) was established in 1998 as a technology and content services hub for NISC Publishing offices spread across the world. NES is renowned for its mastery in data conversion and deduplication of secondary database content. Since 2008, keeping pace with the business dynamics, NES spread into primary publishing and search engine technologies to serve some of the world's best known electronic database publishing companies and institutes of higher education.

We deliver unmatched value through a combination of process excellence, quality control and services such as information & content development, metadata modeling, controlled vocabulary services, data preparation, product quality control & assurance, specialised email support apart from assisting with product development. NES is renowned for its mastery in the de-duplication of bibliographic and metadata records through the creation of composite records.

We are passionate about technology, publishing and the quality of service we provide. Consistently on the lookout for innovation, we welcome exciting talent into our pool to meet and exceed the challenges of this ever changing world.

We have an immediate requirement for the "E-Content Specialist".

Primary Responsibilities:

Published Issue Research [PIR] work involves review of 59,000+ periodicals online at per-determined frequencies to find out their active/inactive status and update latest volume, issue and cover date. Provide a report of missing, delayed, ceased & merged publications to EBSCO and generate a report of back issues & delayed publications for EBSCO to make publisher claims.

Requirements:

Bachelor's Degree (preferred Library science background)

Experience: 0-2 years

Knowledge of Journal publishing
